

## Create account on Github

Creating account on Github .

1. Open browser and search Github, Then click on the first link

The screenshot shows a Google search for 'github'. The search bar at the top contains 'github' and shows 'About 28,60,00,000 results (0.64 seconds)'. The first search result is an advertisement for CircleCI, titled 'CI for GitHub - Build Test and Deploy - CircleCI.com'. Below it is the official GitHub link, 'GitHub: Where the world builds software · GitHub', which is underlined in red. To the right of the search results is a sidebar with the GitHub logo and the text 'IT service management company'. Below the logo, it says 'github.com' and provides a brief description of GitHub as a provider of Internet hosting for software development and version control using Git. It also lists key statistics: 'Founded: 2008', 'CEO: Nat Friedman (29 Oct 2018–)', 'Written in: Ruby; ECMAScript; Go; C', and 'Users: 56 million (Sep 2020)'.

2. Click on sing up

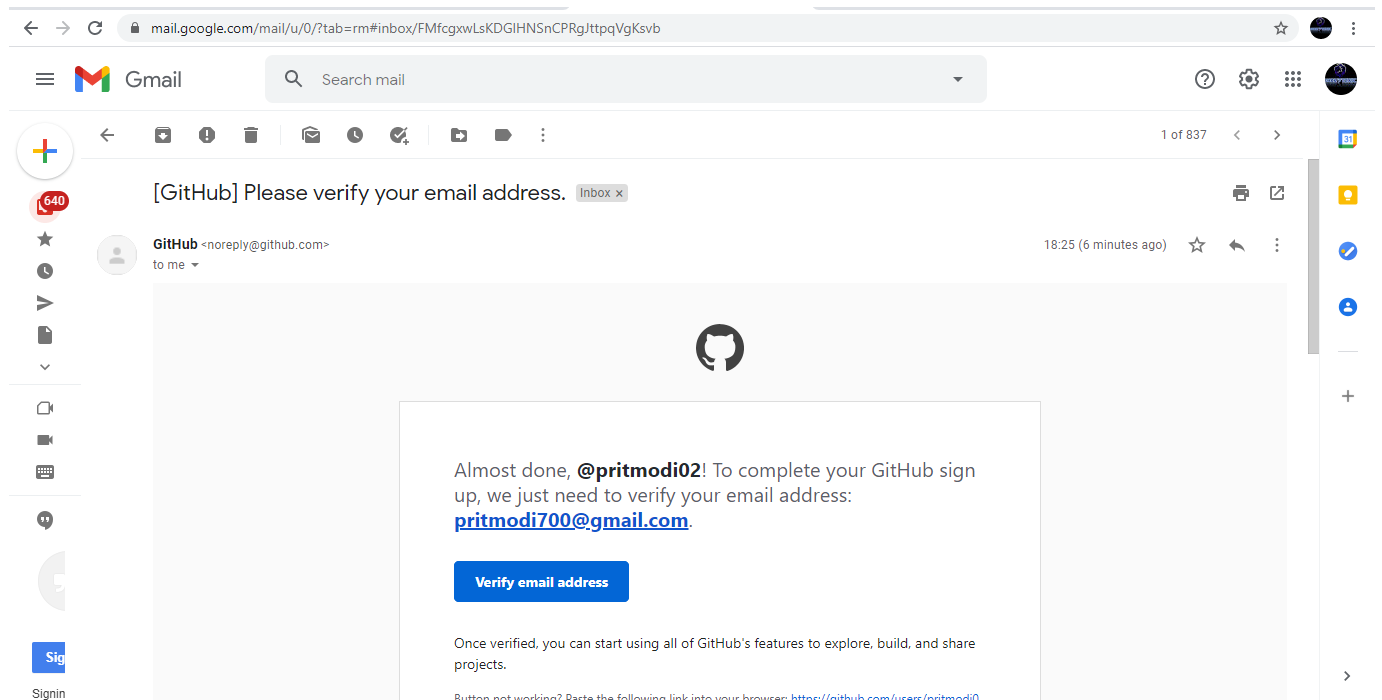

The screenshot shows the GitHub homepage. The header includes navigation links: 'Why GitHub?', 'Team', 'Enterprise', 'Explore', 'Marketplace', and 'Pricing'. A search bar is on the right, followed by 'Sign in' and 'Sign up' buttons. A red arrow points from the 'Sign up' button to the main content area. The main content features the headline 'Where the world builds software' and a sub-headline 'Millions of developers and companies build, ship, and maintain their software on GitHub—the largest and most advanced development platform in the world.' Below this is a form with an 'Email address' input field and a green 'Sign up for GitHub' button. At the bottom, there are four statistics: '56+ million Developers', '3+ million Organizations', '100+ million Repositories', and '72% Fortune 500'. A cartoon astronaut character is visible in the bottom right corner.

3. Enter your details

4. Then click on create account

Then you will get a mail for verify your account

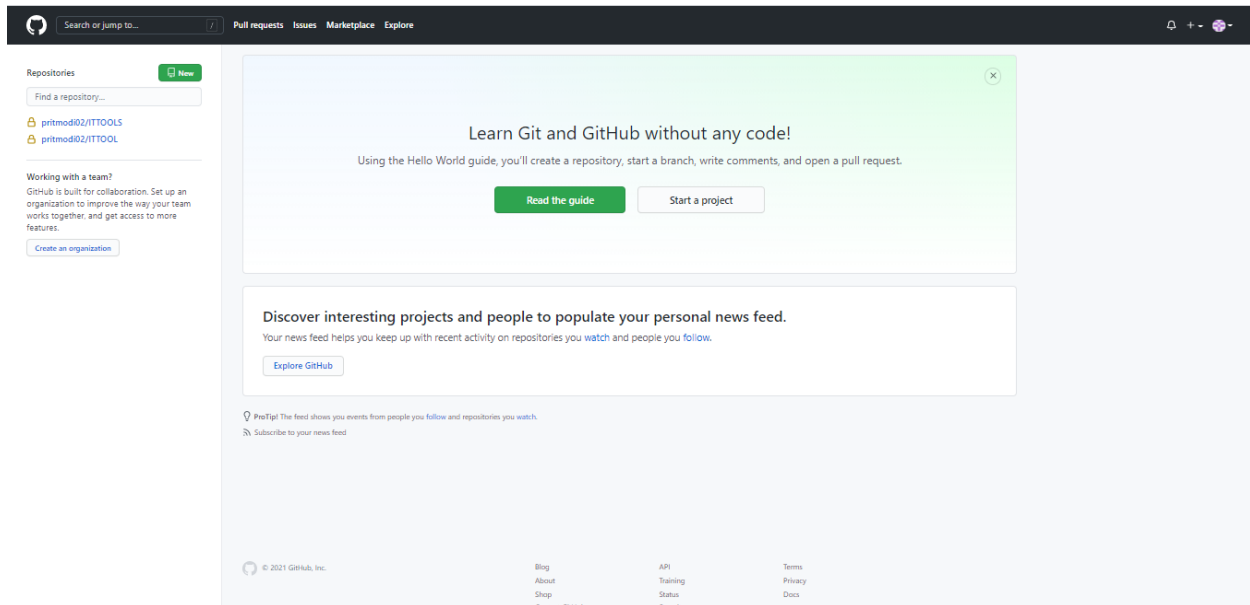

5. After giving details you will get a mail to verify yourself

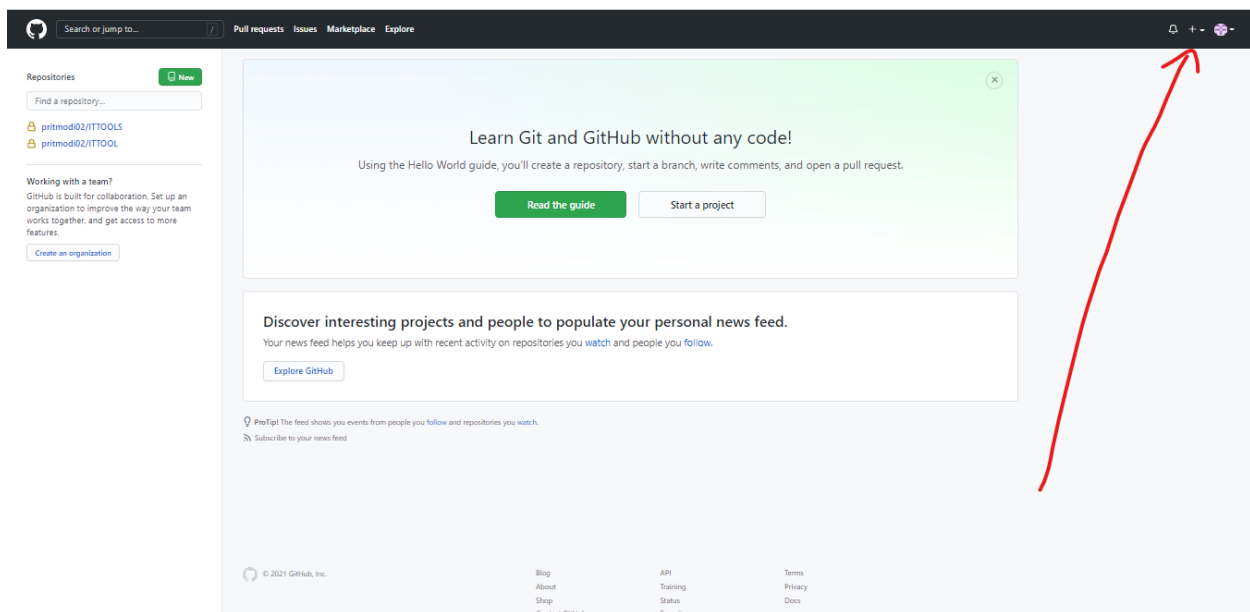

6. You just have to click verify email address

## How to Create Repository on Github

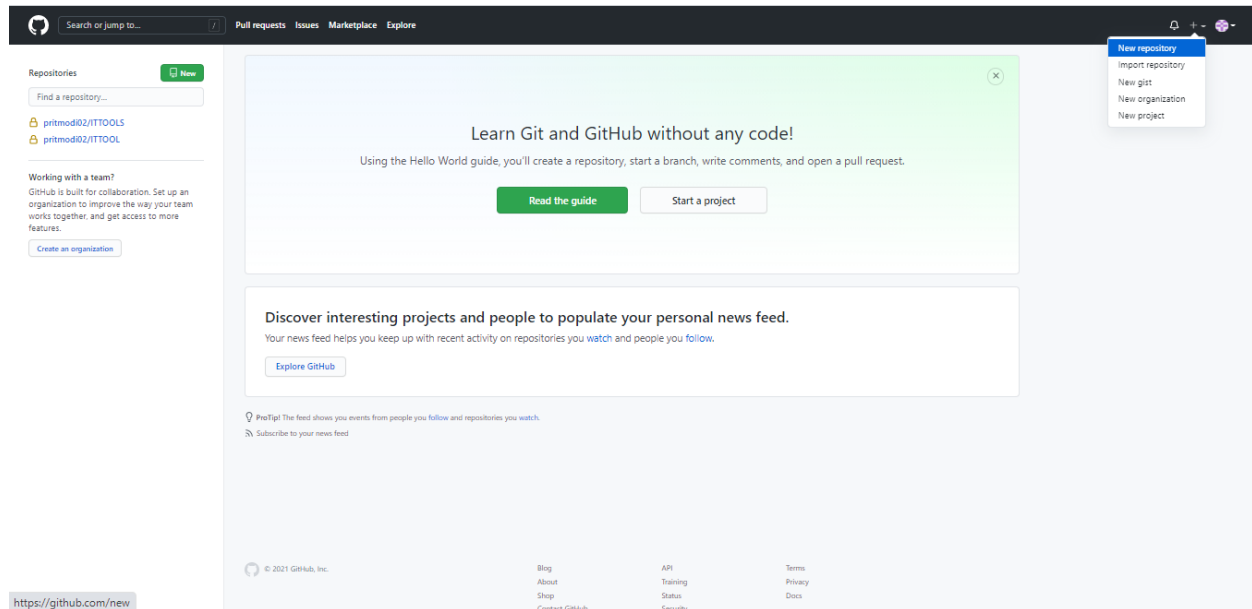

- Open github

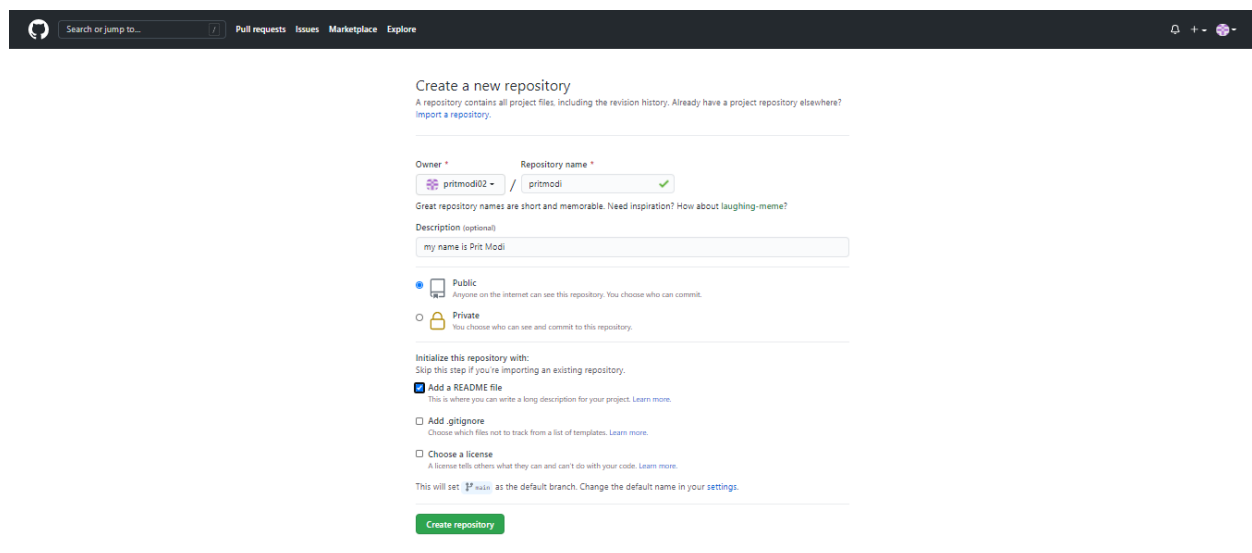

- Then click on ‘+’

- Then click on new repository

- Then type name of repository and select other options

- Then click on create repository

Search or jump to... Pull requests Issues Marketplace Explore

### Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Owner \* Repository name \*

Great repository names are short and memorable. Need inspiration? How about [laughing-meme?](#)

Description (optional)

my name is Prit Modi

☒ Public  
Anyone on the internet can see this repository. You choose who can commit.

☐ Private  
You choose who can see and commit to this repository.

Initialize this repository with:

Skip this step if you're importing an existing repository.

☒ Add a README file  
This is where you can write a long description for your project. [Learn more.](#)

☐ Add .gitignore  
Choose which files not to track from a list of templates. [Learn more.](#)

☐ Choose a license  
A license tells others what they can and can't do with your code. [Learn more.](#)

This will set [main](#) as the default branch. Change the default name in your [settings](#).

- Uploading file in repository
- Click on add file

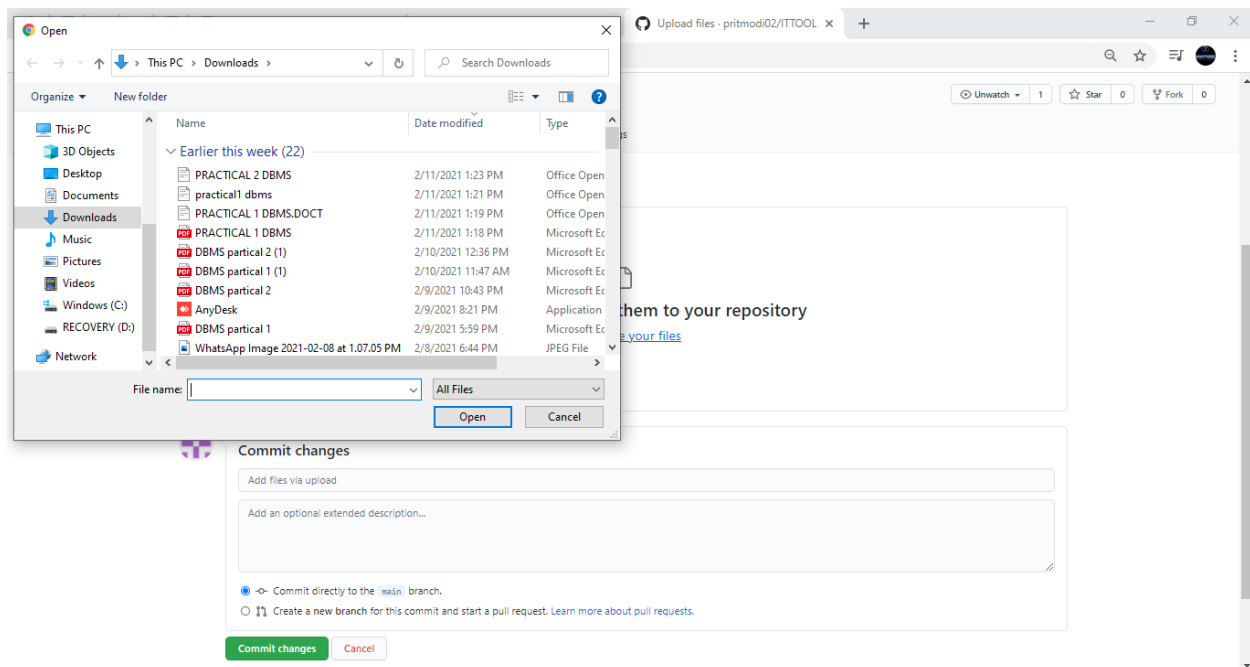

- Click on upload file

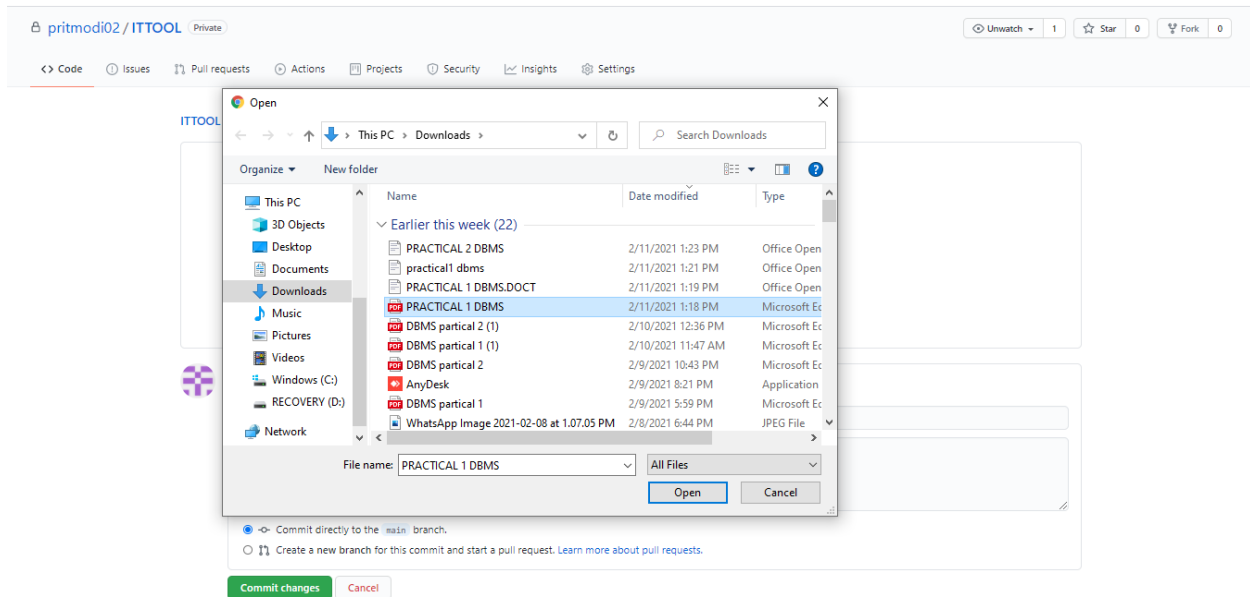

- Click on choose your files

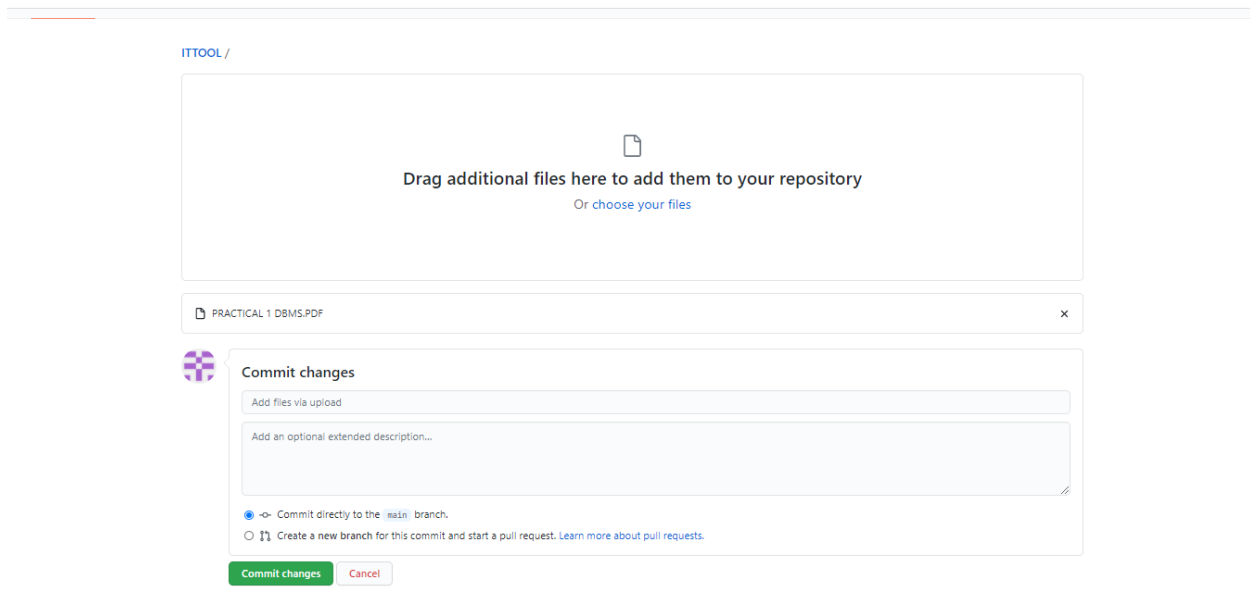

- Then select file from your device

- Then click on open

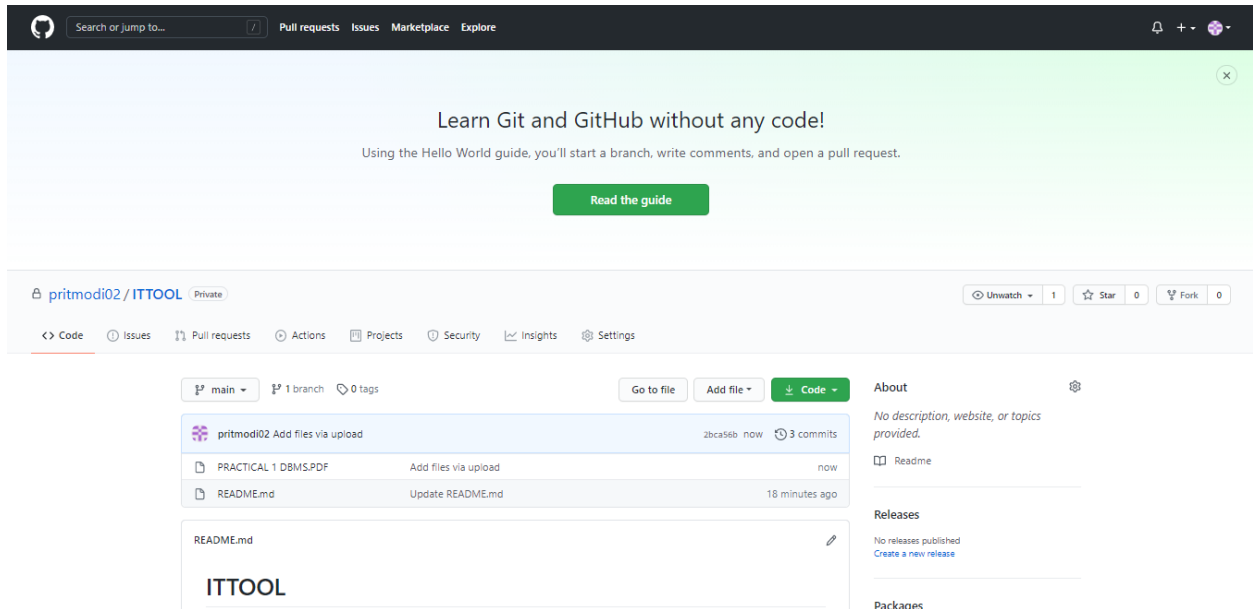

- Then click on commit changes

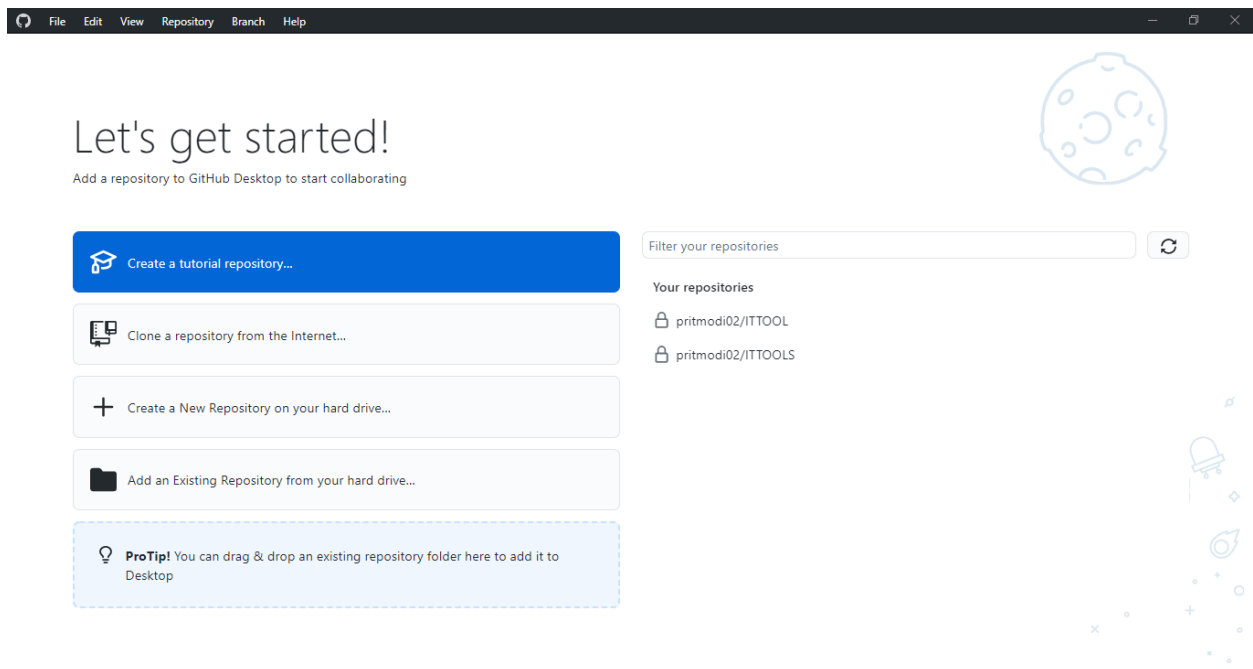

- Your file is uploaded in your repository

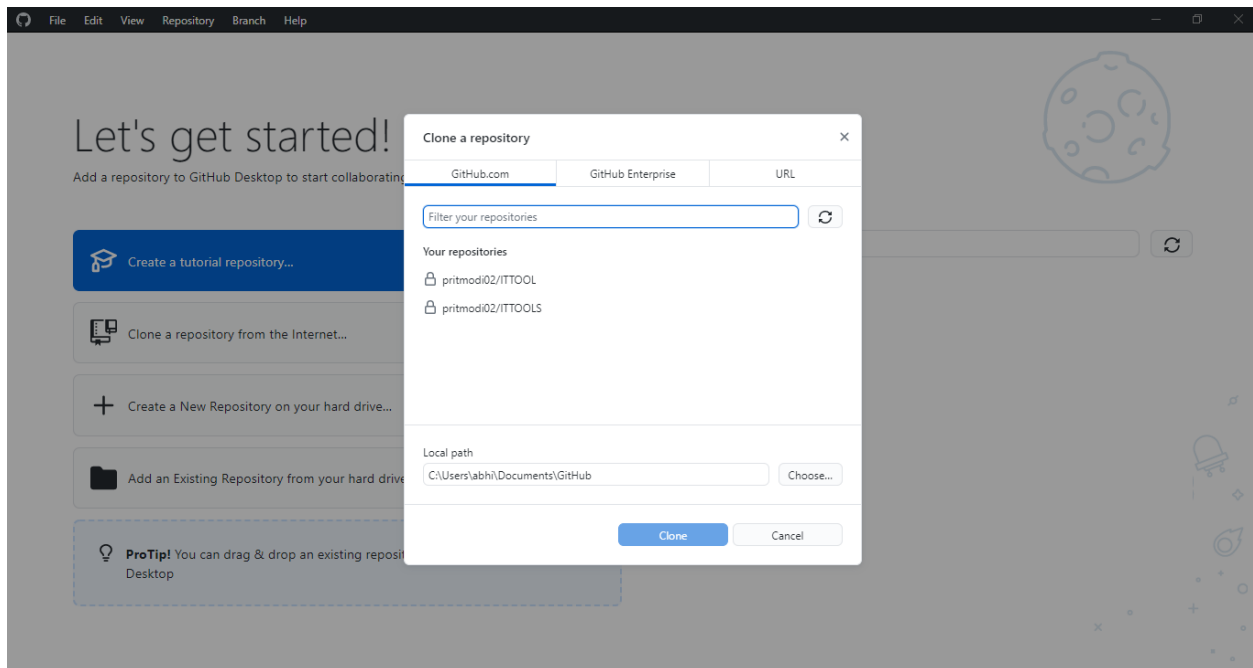

## How to Clone repository ?

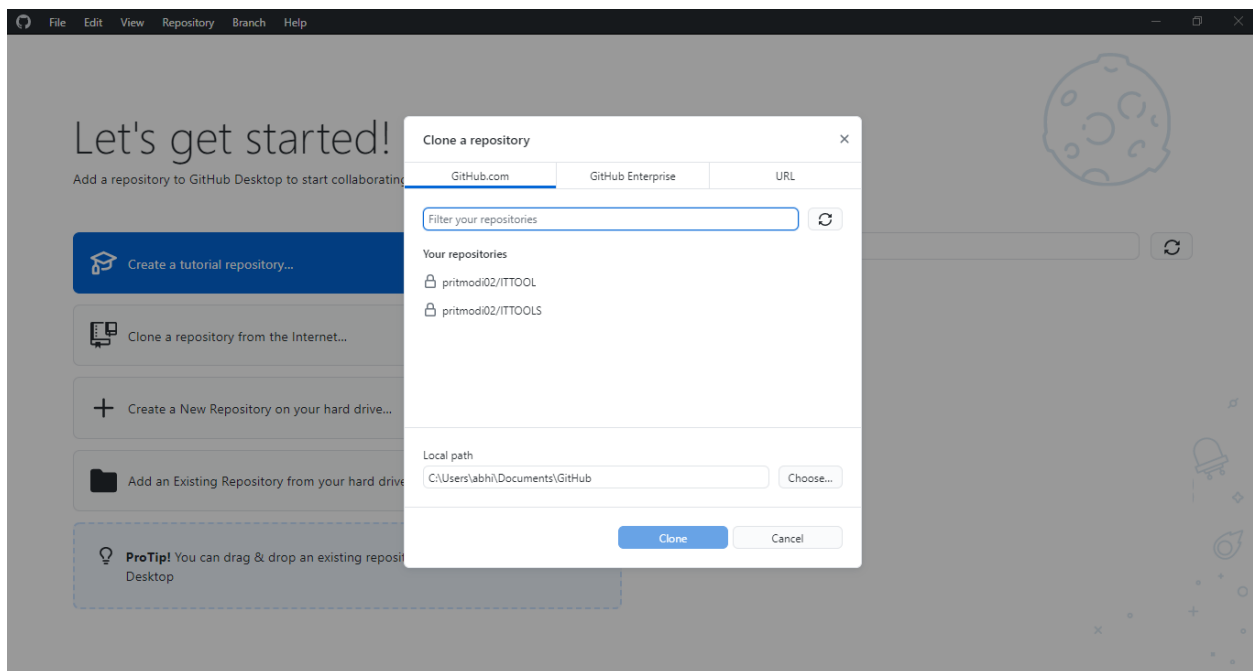

- Open github

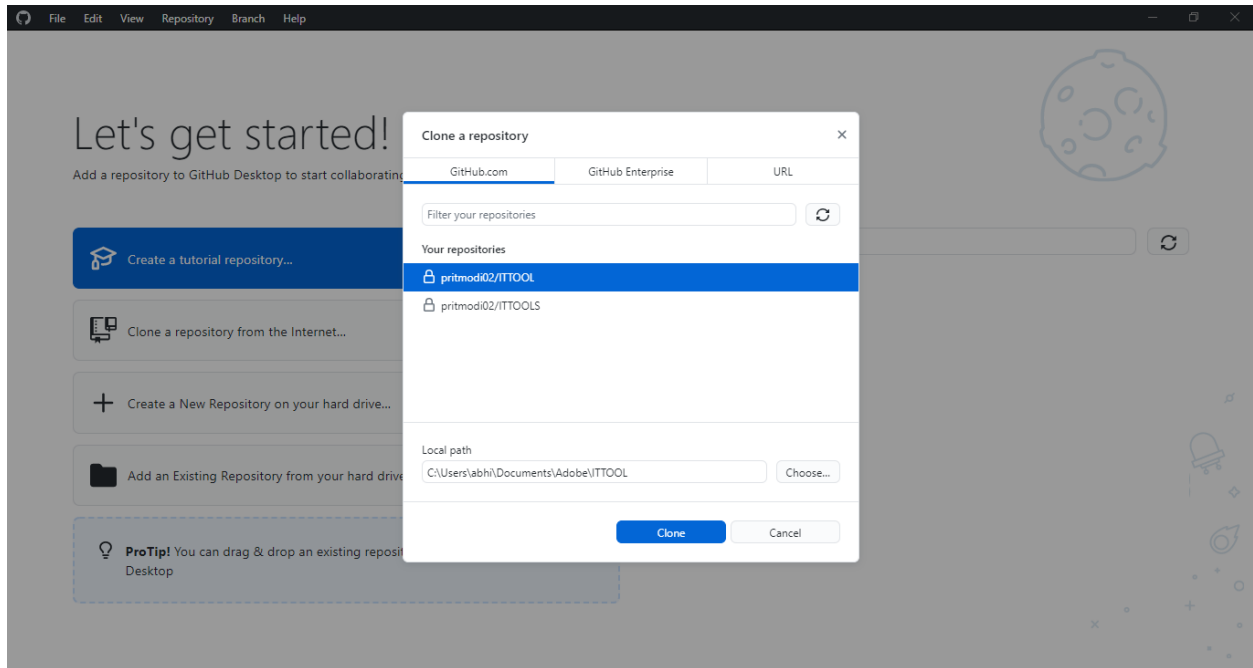

- Then click on clone a repository

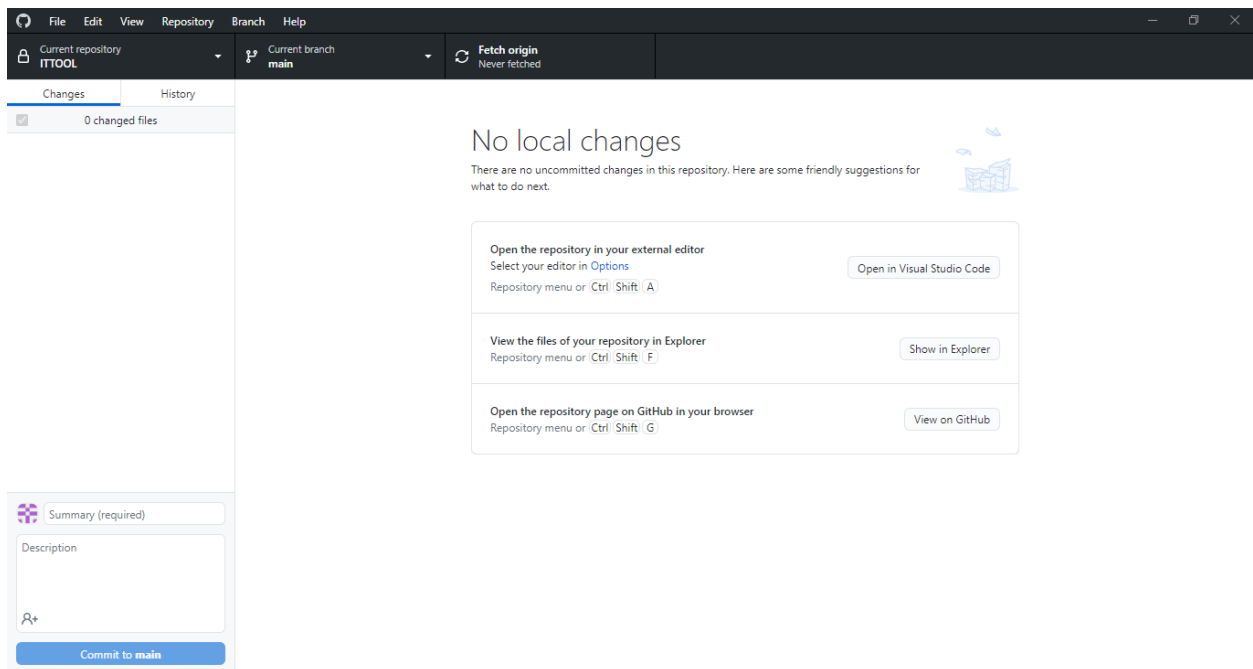

- Then click on repository which you want to clone

- Then choose the empty file location

- Then click on clone

- You can check your clone repository in your drive
